

Health, Safety and Environment Policy

Our values

Health, Safety and Environmental protection are Rotarex group priorities. As a responsible company, we are committed to fighting climate change, biodiversity loss and resources depletion. Rotarex aims to prevent injuries and health problems which could be caused by its activities. The implementation of a corporate HSE standard allows Rotarex to reduce environmental impact and safety risks while complying with requirements.

Our commitments

- ★★ Compliance with Statutory & Regulatory Requirements
- ★★ Provision of a secure work environment
- ★★ Protection of our employees' health while preventing environmental risks

Our priority objectives

- ★★ Continuous awareness-raising of environmental, health and safety issues among all our employees
- ★★ Development of an HSE program, with dedicated objectives, constantly monitored with relevant indicators
- ★★ Manufacture products in a safe manner, considering their impact on the environment and their life cycle
- ★★ Rigorous implementation of health service recommendations
- ★★ Use the best available technologies in production processes
- ★★ Asking our suppliers for the same involvement, especially concerning the choice of sustainable products or services, identifying risks
- ★★ Optimize recycling and reduce wastes
- ★★ Transparent communication with stakeholders

Management undertakes to:

- ★★ Ensure that the HSE system is effective over the long term
- ★★ Support people who make our HSE system robust
- ★★ Promote continuous improvement at all levels

Philippe SCHMITZ
Director and Deputy CEO
